

Statistical bulletin

# Index of Production, UK: April 2020

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

Release date: 12 June 2020

Next release: 14 July 2020

## **Table of contents**

- 1. Main points

- 3. Measuring the data
- 4. Related links

# 1. Main points

- Production output fell by a record 20.3% between March 2020 and April 2020, with manufacturing providing the largest downward contribution, falling by a record 24.3%; there were also falls from mining and quarrying (12.2%), electricity and gas (9.5%) and water and waste (5.3%).
- The monthly decrease of 24.3% in manufacturing output was led by transport equipment, which fell by a record 50.2%, with motor vehicles, trailers and semi-trailers falling by a record 90.3%; of the 13 subsectors, 12 displayed downward contributions.
- Total production output decreased by 9.5% for the three months to April 2020, compared with the three months to January 2020; this was led by manufacturing output, which fell by 10.5%.
- The three-monthly fall in manufacturing is because of widespread weakness, with 12 of the 13 subsectors providing downward contributions; this was led by transport equipment, which fell by 28.3%.
- For the three months to April 2020, production output decreased by 11.9%, compared with the three months to April 2019; this was led by a fall in manufacturing of 14.0% where 12 of the 13 subsectors displayed downward contributions.
- The coronavirus (COVID-19) had a significant negative impact on our estimates of monthly, three-monthly and three-monthly on a year ago growth for production output during April 2020, resulting in record falls across all three estimates; for further and detailed analysis of the effect on our monthly Index of Production (IoP) estimate, please see our article Coronavirus and the impact on output in the UK economy, UK: April 2020, published today (12 June 2020).

## 2. Index of Production data

## Index of Production time series

Dataset DIOP | Released 12 June 2020

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

## Output of the production industries

Dataset | Released 12 June 2020

Index values and growth rates for production, manufacturing and the main industrial groupings in the UK.

### Index of Production and industry sectors to four decimal places

Dataset | Released 12 June 2020

Monthly index values for production and the main Index of Production (IoP) sectors in the UK to four decimal places.

#### Monthly Business Survey turnover in production industries

Dataset | Released 12 June 2020

Monthly Business Survey (MBS) production industries' total turnover, domestic sales and exports in the UK. Figures are in current price and non-seasonally adjusted.

### Export proportions for manufacturing industries

Dataset | Released 12 June 2020

Monthly, three-monthly and annual export data for the manufacturing industries, collected by the MBS at industry level in the UK.

All data related to the IoP are available on the Related data page.

# 3. Measuring the data

The Index of Production (IoP) uses data from a variety of sources and is calculated by taking turnover and removing the impact of price changes or by using direct volume estimates.

The majority of these data are collected as "turnover values" through the Monthly Business Survey (MBS). In addition, direct volume series are collected by the Department for Business, Energy and Industrial Strategy (BEIS) and the International Steel Statistics Bureau (ISSB) for steel industries.

From January 2018, Value Added Tax (VAT) data have also been included across 64 production industries for small and medium-sized businesses. For more information, see <a href="VAT turnover data in national accounts:">VAT turnover data in national accounts:</a> <a href="background">background</a> and <a href="mailto:methodology">methodology</a>.

A comprehensive list of the IoP source data can be found in the <u>Gross domestic product (GDP(O)) source catalogue (XLS, 715KB)</u>.

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in the <u>UK IoP QMI</u>.

## After EU withdrawal

As the UK leaves the EU, it is important that our statistics continue to be of high quality and are internationally comparable. During the transition period, those UK statistics that align with EU practice and rules will continue to do so in the same way as before 31 January 2020.

After the transition period, we will continue to produce our national accounts statistics in line with the UK Statistics Authority's <u>Code of Practice for Statistics</u> and in accordance with internationally agreed statistical guidance and standards.

The Withdrawal Agreement outlines a need for UK Gross National Income (a fundamental component of the national accounts, which includes gross domestic product (GDP)) statistics to remain in line with those of other EU countries until the EU budgets are finalised for the years in which we were a member. To ensure comparability during this cycle, the national accounts will continue to be produced according to <a href="European System of Accounts (ESA) 2010"><u>European System of Accounts (ESA) 2010</u></a> definitions and standards.

## **Coronavirus (COVID-19)**

The Office for National Statistics' (ONS') Monthly Business Survey (MBS) is fully online, meaning that business owners can logon from any location and submit their data at an appropriate time. Most other data in the IoP come from the BEIS and therefore will be less impacted than survey data.

Our latest data and analysis on the impact of the coronavirus (COVID-19) on the UK economy and population is now available on a <u>new web page</u>. This will be the hub for all special coronavirus-related publications, including the fortnightly Business Impact of Coronavirus (COVID-19) Survey (BICS).

The ONS has released a <u>public statement</u> on COVID-19 and the production of statistics. Specific queries must be directed to the Media Relations Office.

## 4. Related links

## Coronavirus and the impact on output in the UK economy, UK: April 2020

Article | Released 12 June 2020

Analysis of monthly growth for the production, services and construction industries in the UK economy between March and April 2020, highlighting the early impact from the coronavirus (COVID-19) pandemic.

#### Comparison of motor vehicle manufacturing output statistics, UK: 1997 to 2019

Article | Released 10 January 2020

A comparison of the methodologies used to estimate motor vehicle manufacturing outputs by the Office for National Statistics (ONS) and the Society of Motor Manufacturers and Traders (SMMT).

### A comparison between official estimates of UK output and diffusion indices

Article | Released 21 October 2019

The level of correlation between ONS data and IHS Markit and Chartered Institute of Procurement and Supply Purchasing Managers' Indices.

## GDP monthly estimate, UK: April 2020

Bulletin | Released 12 June 2020

Gross domestic product (GDP) measures the value of goods and services produced in the UK. It estimates the size of and growth in the economy and includes the Index of Production (IoP), Index of Services (IoS) and construction output in Great Britain.

## Producer price inflation, UK: April 2020

Bulletin | Released 20 May 2020

The corresponding price indices used to deflate the IoP are published in the monthly publication of <u>UK producer price inflation</u>.

#### UK manufacturers' sales by product (ProdCom): 2018 revised results

Bulletin | Released 2 December 2019

Product sales by manufacturers are published on an annual basis in <u>ProdCom</u> statistical bulletins; estimates are in current prices, unlike the chained volume measures published in the IoP release.

## Energy Trends: March 2020

Bulletin | Released 26 March 2020

The data published by the Department for Business, Energy and Industrial Strategy (BEIS) in <u>Energy Trends</u> are used to measure the mining and quarrying, electricity and gas, and manufacture of coke and refined petroleum products sectors within this release.
