

Statistical bulletin

## Index of Production, UK: June 2023

Movements in the volume of production for UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management.

Release date: 11 August 2023

Next release: 13 September 2023

### 1. Main points

- Monthly production output is estimated to have risen 1.8% in June 2023, the strongest monthly growth to the Index of Production (IoP) since August 2020 (1.9%); this follows an unrevised fall of 0.6% in May 2023.
- The monthly increase in IoP output in June 2023 resulted from a rise in two of the four production sectors, with manufacturing being the main positive contributor (1.7 percentage points), with a smaller contribution from water supply and sewerage (0.2 percentage points); electricity and gas remain unchanged on the month, with growth partially offset by a small contribution from mining and quarrying, which negatively contributed 0.1 percentage points.
- There was no explicit adjustment for the additional bank holiday held for the coronation of King Charles III
  on 8 May 2023 because this was an adhoc event (non-regular calendar effect); the timing of the bank
  holiday affects the number of trading days in May 2023, which users should consider when interpreting
  data on monthly movements in the IoP between May and June 2023.
- Monthly manufacturing output increased by 2.4%, the strongest monthly rise since November 2020 (2.5%), and saw 11 of its 13 sub-sectors positively contributing to growth during June 2023; most notably, the manufacture of basic pharmaceutical products and manufacture of transport equipment contributed 0.48 and 0.45 percentage points, respectively to the IoP June 2023 monthly growth.
- Monthly production output was 1.7% above February 2020, the last month of "normal" trading conditions before the coronavirus (COVID-19) pandemic; manufacturing and water supply and sewerage were above their February 2020 levels, by 3.9% and 8.9%, respectively, electricity and gas remained unchanged, and mining and quarrying was 24.6% below its February 2020 level.
- Looking at the longer-term profile, production output growth for Quarter 2 (Apr to June) 2023 rose by 0.7% compared with Quarter 1 (Jan to Mar), showing the strongest quarterly growth since Quarter 4 (Oct to Dec) 2020 (4.1%); growth came primarily from manufacturing, which contributed 1.2 percentage points to the IoP Quarter 2 2023 quarterly growth.
- Further analysis of the effect on our monthly IoP estimate is available in our <u>Gross domestic product (GDP)</u> <u>monthly estimate</u>, <u>UK: June 2023</u> bulletin, published 11 August 2023.

### 2. Index of Production (IoP) data

#### Index of Production time series

Dataset DIOP | Released 11 August 2023

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

#### Output of the production industries

Dataset | Released 11 August 2023

Index values and growth rates for production, manufacturing and the main industrial groupings in the UK.

#### Index of Production and industry sectors to four decimal places

Dataset | Released 11 August 2023

Monthly index values for production and the main Index of Production sectors in the UK to four decimal places.

#### Monthly Business Survey turnover in production industries

Dataset | Released 11 August 2023

Monthly Business Survey production industries' total turnover, domestic sales and exports in the UK. Figures are in current price and are non-seasonally adjusted.

#### Export proportions for manufacturing industries

Dataset | Released 11 August 2023

Monthly, quarterly and annual export data for the manufacturing industries, collected by the Monthly Business Survey at industry level in the UK.

All data related to the IoP are available on ourRelated data page.

### 3. Measuring the data

The Index of Production (IoP) uses data from a variety of sources. It is calculated by taking turnover and removing the impact of price changes, or by using direct volume estimates.

Most of these data are collected as "turnover values" through the Monthly Business Survey (MBS). In addition, direct volume series are collected by the Department for Energy Security and Net Zero (DESNZ), and the International Steel Statistics Bureau (ISSB) for steel industries.

The Office for National Statistics' (ONS) Monthly Business Survey (MBS) is fully online. Business owners can log on from any location and submit their data at an appropriate time. Most other data in the IoP come from the DESNZ, and therefore will be less affected than the survey data.

From January 2018, Value Added Tax (VAT) data have also been included across 64 production industries for small and medium-sized businesses. For more information, seeour <u>VAT turnover data in National Accounts:</u> <u>background and methodology article</u>.

A comprehensive list of the IoP source data can be found in our<u>Gross domestic product (GDP) data sources catalogue (XLS, 1.9MB)</u>.

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in our <u>UK Index of Production Quality and Methodology Information (QMI)</u>.

#### **Revisions to IoP**

In line with the <u>National Accounts revision policy</u>, this release gives data for June 2023 for the first time, with May and April 2023 also open for revision.

### 4. Related links

#### GDP monthly estimate, UK: June 2023

Bulletin | Released 11 August 2023

Gross domestic product (GDP) measures the value of goods and services produced in the UK. It estimates the size of, and growth in, the economy.

#### Index of Services, UK: June 2023

Bulletin | Released 11 August 2023

Movements in the volume of output for the UK services industries. Figures are seasonally adjusted.

#### Producer price inflation, UK: June 2023

Bulletin | Released 19 July 2023

Changes in the prices of goods bought and sold by UK manufacturers including price indices of materials and fuels purchased (input prices) and factory gate prices (output prices).

#### UK manufacturers' sales by product: 2021 results

Bulletin | Released 23 August 2022

Estimates for UK manufacturers' sales by product (ProdCom) for 2021, including 2020 final sales data.

#### Energy Trends and Prices: monthly data

Web page | Last updated 27 July 2023

Provides statistics on energy prices and monthly production, trade and consumption of coal, electricity, gas, oil and total energy in the UK.
