

Statistical bulletin

Index of Production, UK: November 2020

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

Release date: 15 January 2021

Next release: 12 February 2021

Table of contents

- 1. Main points
- 2. Index of Production data
- 3. Measuring the data
- 4. Related links

1. Main points

- Production output fell by 0.1% between October 2020 and November 2020, with falls of 3.4% in mining and quarrying, 2.3% in electricity and gas and 0.4% in water and waste; this was offset by a rise in manufacturing of 0.7%.
- In November 2020 production output was 4.7% below February 2020, the previous month of "normal" trading conditions, prior to the coronavirus (COVID-19) pandemic.
- The monthly increase of 0.7% in manufacturing output was led by manufacturing of transport equipment; 8 of the 13 subsectors displayed upward contributions.
- Total production output increased by 4.7% for the three months to November 2020, compared with the three months to August 2020; this was because of weak output in June 2020.
- For the three months to November 2020, compared with the three months to November 2019, production output decreased by 5.6%; this was led by a fall in manufacturing of 5.5%.
- The coronavirus continued to have a significant impact on production output during November 2020; for further and detailed analysis of the effect on our monthly index of production estimate, please see our article <u>Coronavirus and the impact on output in the UK economy, UK: November 2020</u>, published today (15 January 2021).

2. Index of Production data

Index of Production time series

Dataset DIOP | Released 15 January 2021

Movements in the volume of production for the UK production industries: manufacturing, mining and quarrying, energy supply, and water and waste management. Figures are seasonally adjusted.

Output of the production industries

Dataset | Released 15 January 2021

Index values and growth rates for production, manufacturing and the main industrial groupings in the UK.

Index of Production and industry sectors to four decimal places

Dataset | Released 15 January 2021

Monthly index values for production and the main Index of Production (IoP) sectors in the UK to four decimal places.

Monthly Business Survey turnover in production industries

Dataset | Released 15 January 2021

Monthly Business Survey (MBS) production industries' total turnover, domestic sales and exports in the UK. Figures are in current price and non-seasonally adjusted.

Export proportions for manufacturing industries

Dataset | Released 15 January 2021

Monthly, three-monthly and annual export data for the manufacturing industries, collected by the MBS at industry level in the UK.

All data related to the IoP are available on the Related data page.

3. Measuring the data

The Index of Production (IoP) uses data from a variety of sources and is calculated by taking turnover and removing the impact of price changes or by using direct volume estimates.

The majority of these data are collected as "turnover values" through the Monthly Business Survey (MBS). In addition, direct volume series are collected by the Department for Business, Energy and Industrial Strategy (BEIS) and the International Steel Statistics Bureau (ISSB) for steel industries.

From January 2018, Value Added Tax (VAT) data have also been included across 64 production industries for small and medium-sized businesses. For more information, see VAT turnover data in national accounts: background and methodology.

A comprehensive list of the IoP source data can be found in the <u>Gross domestic product (GDP(O)) source catalogue (XLS, 715KB)</u>.

More quality and methodology information on strengths, limitations, appropriate uses, and how the data were created is available in the <u>UK IoP QMI</u>.

More about economy, business and jobs

- All ONS analysis, summarised in our economy, business and jobs roundup.

Leaving the EU

As the transition period ends and the UK enters into a new Trade and Co-operation Agreement with the EU, the UK statistical system will continue to produce and publish our wide range of economic and social statistics and analysis. We are committed to continued alignment with the highest international statistical standards, enabling comparability both over time and internationally, and ensuring the general public, statistical users and decision-makers have the data they need to be informed.

Additionally, the Withdrawal Agreement outlines a need for UK gross national income (a fundamental component of the national accounts, which includes gross domestic product (GDP)) statistics to remain in line with those of other EU countries. This is until EU budget contributions are finalised for the years in which we were a member, and making budget contributions during the transition period. To ensure this comparability during this period, the national accounts will continue to be produced according to European System of Accounts (ESA) 2010 definitions and standards until at least 2024.

As the shape of the UK's future statistical relationship with the EU becomes clearer over the coming period, the Office for National Statistics (ONS) is making preparations to assume responsibilities that as part of our membership of the EU, and during the transition period, were delegated to the statistical office of the EU, Eurostat. This includes responsibilities relating to international comparability of economic statistics, deciding what international statistical guidance to apply in the UK context and to provide further scrutiny of our statistics and sector classification decisions.

In applying international statistical standards and best practice to UK economic statistics, we will draw on the technical advice of experts in the UK and internationally, and our work will be underpinned by the UK's well-established and robust framework for independent official statistics, set out in the Statistics and Registration Service Act 2007. Further information on our proposals will be made available early in 2021.

Coronavirus (COVID-19)

The ONS's Monthly Business Survey (MBS) is fully online, meaning that business owners can log on from any location and submit their data at an appropriate time. Most other data in the IoP come from the BEIS and therefore will be less impacted than survey data.

Our latest data and analysis on the impact of the coronavirus (COVID-19) on the UK economy and population is available on <u>our Coronavirus page</u>. This is the hub for all special coronavirus-related publications, including the fortnightly Business Impact of Coronavirus (COVID-19) Survey (BICS).

The ONS has released a <u>public statement</u> on COVID-19 and the production of statistics. Specific queries must be directed to the <u>Media Relations Office</u>.

Coronavirus and the impact on output in the UK economy, UK: November 2020

Article | Released 15 January 2021

Analysis of monthly growth for the production, services and construction industries in the UK economy between October and November 2020, highlighting the early impact from the coronavirus (COVID-19) pandemic.

Comparison of motor vehicle manufacturing output statistics, UK: 1997 to 2019

Article | Released 10 January 2020

A comparison of the methodologies used to estimate motor vehicle manufacturing outputs by the Office for National Statistics (ONS) and the Society of Motor Manufacturers and Traders (SMMT).

A comparison between official estimates of UK output and diffusion indices

Article | Released 21 October 2019 The level of correlation between ONS data and IHS Markit and Chartered Institute of Procurement and Supply Purchasing Managers' Indices.

GDP monthly estimate, UK: November 2020

Bulletin | Released 15 January 2021

Gross domestic product (GDP) measures the value of goods and services produced in the UK. It estimates the size of and growth in the economy and includes the Index of Production (IoP), Index of Services (IoS) and construction output in Great Britain.

Producer price inflation, UK: November 2020

Bulletin | Released 16 December 2020

The corresponding price indices used to deflate the IoP are published in the monthly publication of <u>UK producer price inflation</u>.

UK manufacturers' sales by product (ProdCom): 2019 results

Bulletin | Released 1 July 2020

Product sales by manufacturers are published on an annual basis in <u>ProdCom</u> statistical bulletins; estimates are in current prices, unlike the chained volume measures published in the IoP release.

Energy Trends: October 2020

Bulletin | Released 26 November 2020

The data published by the Department for Business, Energy and Industrial Strategy (BEIS) in <u>Energy Trends</u> are used to measure the mining and quarrying, electricity and gas, and manufacture of coke and refined petroleum products sectors within this release.
