1 . Main points

- In Quarter 2 (Apr to June) 2018, household spending (adjusted for inflation) grew by 0.4% compared with Quarter 1 (Jan to Mar) 2018.
- The main contributor to growth was miscellaneous goods and services, which increased by 1.5% compared with Quarter 1 2018.
- Household spending grew by 1.6% in Quarter 2 2018 compared with Quarter 2 2017.
- Current price spending grew by 0.6% in Quarter 2 2018 compared with Quarter 1 2018.

2 . Things you need to know about this release

The quarterly Consumer trends data are typically published around 90 days after the end of the quarter.

Unless otherwise stated all figures are [chained volume measure](#), seasonally adjusted.

The data are consistent with [Blue Book 2018](#).

Household final consumption expenditure (HHFCE) includes spending on goods and services except for: buying or extending a house, investment in valuables (for example, paintings and antiques) or purchasing second-hand goods. Explanations for these exceptions and the related concepts are available in [Consumer trends guidance and methodology](#).

Household expenditure is used in the national accounts to measure the contribution of households to economic growth and accounts for about 60% of the expenditure measure of [gross domestic product \(GDP\)](#). There are two measures:

- current prices – also known as nominal, cash or value series are expressed in terms of the prices of the time period being estimated
- chained volume measure – this measure removes the effects of inflation

The estimate of HHFCE where net tourism expenditure is included is called the UK national estimate. When net tourism is excluded, this produces the aggregate total UK domestic expenditure. Lower-level analyses in this bulletin are based on the domestic concept. This is discussed in greater detail in [Definitions and conventions for UK HHFCE \(Word, 58KB\)](#).

[Time series data](#) for Consumer trends are also available.

3 . Household spending (adjusted for inflation) grew by 0.4% in Quarter 2 2018

In Quarter 2 (Apr to June) 2018, the [chained volume measure](#) of household spending increased by 0.4%. The [current price](#) value of household spending increased by 0.6% compared with Quarter 1 (Jan to Mar) 2018. Figure 1 shows the levels of current price and volume spending from Quarter 1 1997 onwards.

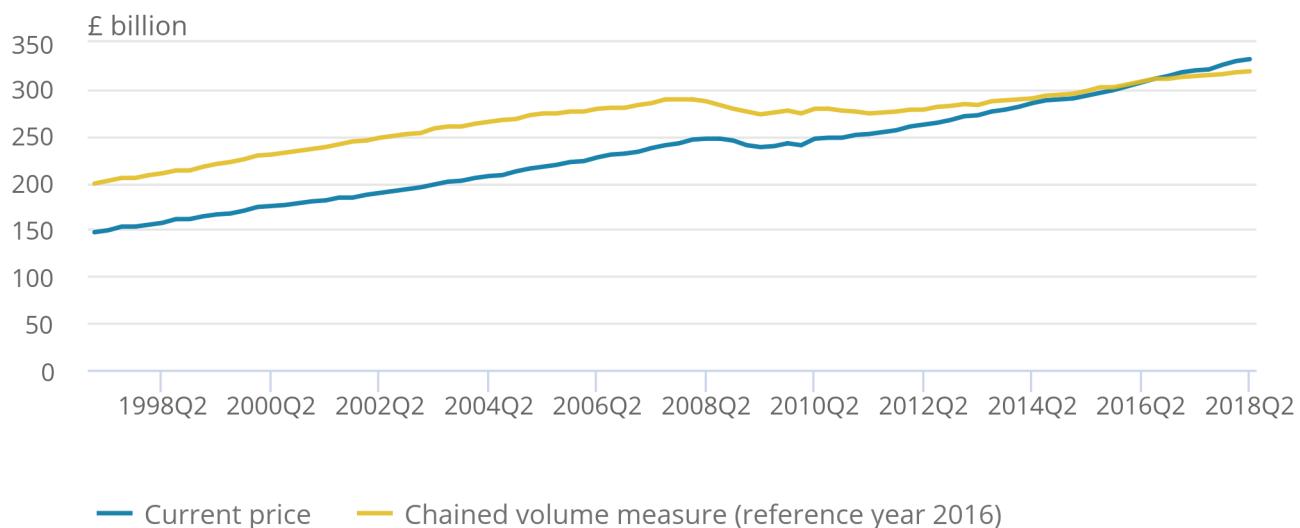

In Quarter 2 2018, the value of household spending in current prices increased by 3.6% on the same quarter in 2017. When comparing the volume measure of household spending in Quarter 2 2018 with the same quarter in 2017, it increased by 1.6%.

Notes:

1. Q1 refers to Quarter 1 (Jan to Mar), Q2 refers to Quarter 2 (Apr to June), Q3 refers to Quarter 3 (July to Sept), and Q4 refers to Quarter 4 (Oct to Dec).

Since the economic downturn in 2008 to 2009 (reaching its lowest point in Quarter 2 2009), household final consumption expenditure (HHFCE) has grown by 16.9% in volume terms. In current prices, it has grown by 39.4% (£93,833 million). This shows that whilst household spending has increased during this period, the volume of goods and services purchased by households has increased at a far lesser rate, indicating the effect of price inflation.

The quarterly growth in 2017 remained stable in the last three quarters at 0.3%. However, the quarter-on-quarter year growth in Quarter 3 (July to Sept) 2017 reached its lowest rate (1.3%) since Quarter 1 2012, which has slightly recovered in the latest quarters. Household spending increased by 1.9% in 2017 when compared with 2016. This is the lowest rate of year-on-year growth since 2012, when growth in household spending was 1.7%.

4 . What are the main contributors to top-level growth?

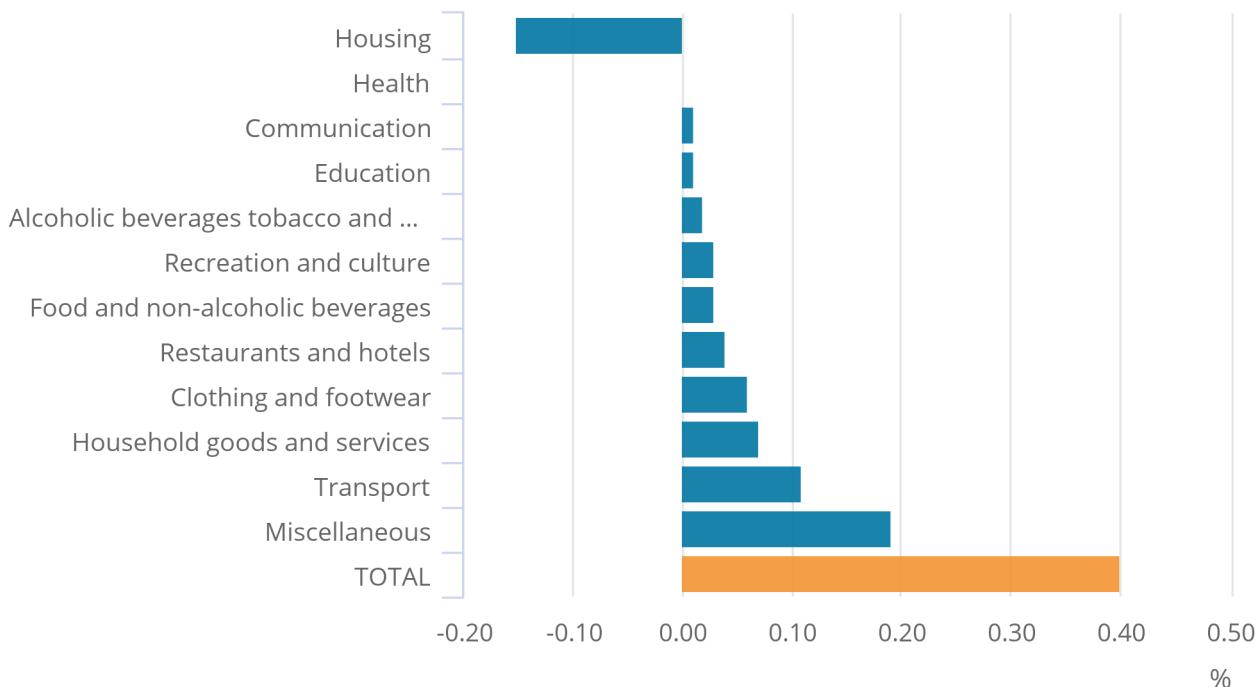

As illustrated in Figure 2, the main contributors to the 0.4% domestic growth in consumer spending in Quarter 2 (Apr to June) 2018 were miscellaneous goods and services, and transport, which contributed 0.19% and 0.11% respectively. The third-largest contribution to the overall growth was made by household goods and services with 0.07%.

Figure 2: COICOP contribution to overall growth, domestic measure, chained volume measure, seasonally adjusted, UK

Source: Office for National Statistics

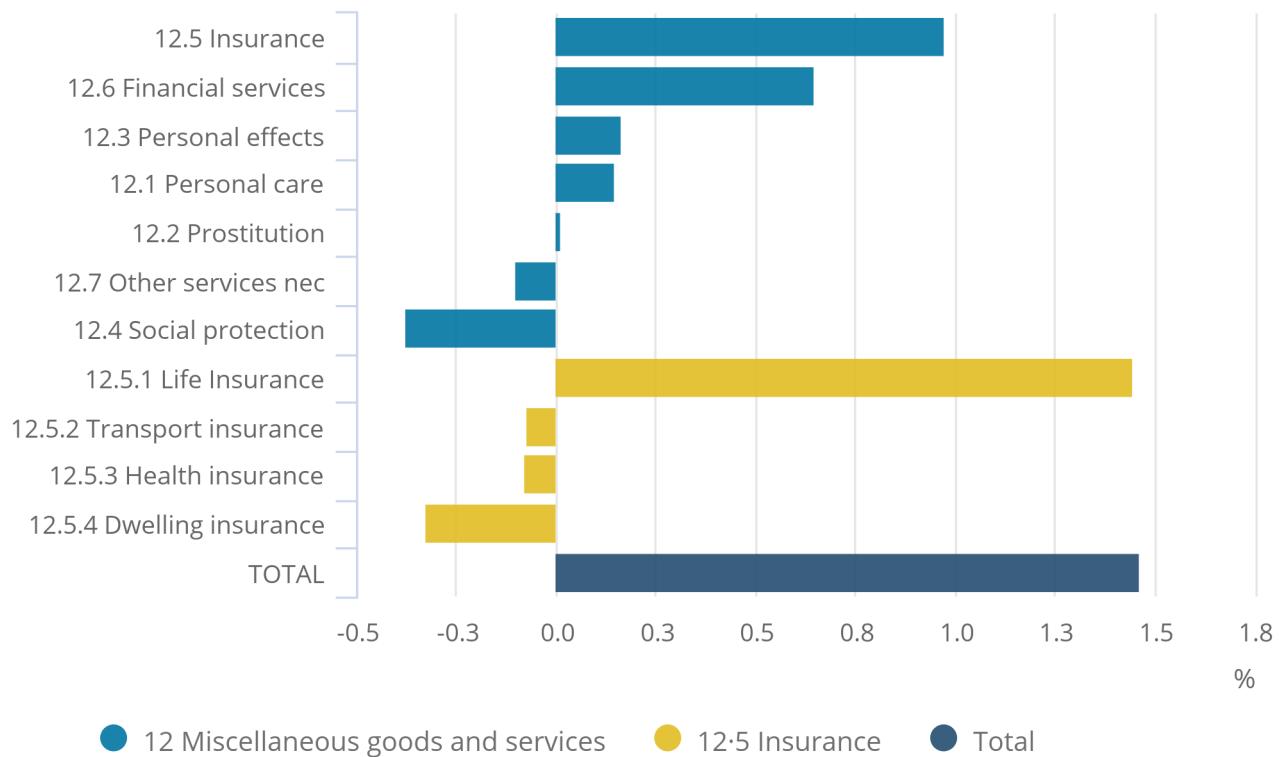

As illustrated in Figure 3, the 0.19% contribution from miscellaneous goods and services was due to its growth of 1.5% quarter-on-quarter. Within that category, the growth was driven mainly by life insurance, which grew by 19.9% quarter-on-quarter, contributing 0.19% to total domestic expenditure growth.

At the most detailed level we record, Table 1 shows the areas that displayed the highest growth in the latest quarter.

At this level, Table 2 shows the areas that displayed the largest decline in Quarter 2 2018. These are both related to energy and are probably linked to the weather conditions: the UK experienced a colder Quarter 1 in 2018 and the warmest second quarter since 2000 according to the [Department for Business, Energy and Industrial Strategy's Energy trends: weather publication](#).

5 . Household final consumption expenditure revisions, Quarter 2 2018

In common with all components of UK gross domestic product (GDP), household final consumption expenditure (HHFCE) estimates are subject to the [revisions policy of the UK National Accounts](#). This allows revisions to estimates to be made at particular times of the year.

In Quarter 2 (Apr to June) 2018, the revisions to total household final consumption expenditure have been made from Quarter 1 (Jan to Mar) 2017.

Revisions between the previous edition of Consumer trends (Quarter 1 (Jan to Mar) 2018) and the latest HHFCE estimates are summarised in Table 3. The revisions reflect methodological changes in the compilation of estimates, updated data from suppliers, as well as adjustments to HHFCE as a result of the GDP balancing process.

Notes:

1. Q1 refers to Quarter 1 (Jan to Mar), Q2 refers to Quarter 2 (Apr to June), Q3 refers to Quarter 3 (July to Sept), and Q4 refers to Quarter 4 (Oct to Dec).

All growth rates in Consumer trends are rounded to one decimal place. This may cause disparity between revisions displayed in the main Consumer trends tables and the revisions table.

6 . Links to related statistics

[Family spending](#) – This comes from the Living Costs and Food (LCF) Survey, which surveys households on their income and expenditure on consumer goods and services. We primarily use data from the LCF survey to compile household final consumption expenditure (HHFCE) data on food.

[Annual Business Survey](#) – This survey includes the turnover of businesses in the retail sector. We primarily use these data to compile HHFCE data on clothing and footwear.

[Retail sales](#) – This comes from the retail sales inquiry, which surveys businesses in the retail sector on their sales. We primarily use data from retail sales to assign a quarterly path to the annual figures received from the Annual Business Survey.

[Quarterly national accounts](#) – Our data feed into gross domestic product (GDP), for which it makes up roughly 60% of the expenditure measure. More details about this quarter's GDP and its components are available in the [latest release](#). The Quarterly national accounts release also contains analysis on the data included within this publication and its implications for the wider economy.

Further quarterly national accounts, quarterly sector accounts and financial accounts tables are available in the [UK Economic Accounts](#).

7 . Quality and methodology

[Consumer trends guidance](#) offers fuller details regarding this publication.

We have published a [Quality and Methodology Information report](#) for this statistical bulletin and details on changes to estimates and methodology in Blue Book 2018.

The Consumer trends Quality and Methodology Information report contains important information on:

- the strengths and limitations of the data and how it compares with related data
- uses and users of the data
- how the output was created
- the quality of the output including the accuracy of the data.

Full information on the Classification of individual consumption by purpose (COICOP) classification system can be found on the [United Nations Statistics Division website](#).

Quality of the estimates

Household expenditure volume series are chain-linked annually. Estimates in this Consumer trends bulletin are now based on 2016 price structures; that is, the chained volume measure estimate in 2016 equals the current price value of expenditure in 2016.

Growth in each year up to and including 2016 is calculated at average prices of the previous year. Growth from 2016 onwards is calculated at average prices of 2016. Volume series are only additive for the most recent periods; that is, annual data for 2016 onwards and quarterly data for Quarter 1 (Jan to Mar) 2017 onwards.

Very few statistical revisions arise as a result of “errors” in the popular sense of the word. All estimates, by definition, are subject to statistical “error” but in this context the word refers to the uncertainty inherent in any process or calculation that uses sampling, estimation or modelling. Most revisions reflect either the adoption of new statistical techniques or the incorporation of new information that allows the statistical error of previous estimates to be reduced. Only rarely are there avoidable “errors” such as human or system failures and such mistakes are made clear when they do occur.

Coherence

Household final consumption expenditure estimates published in Consumer trends are a component of the gross domestic product (GDP) expenditure approach. However, the preliminary estimate for GDP is produced based on the GDP output approach. Historic experience shows that the output approach provides the best timely approach to measuring GDP growth. GDP growth according to the expenditure and income approaches is therefore brought into line with that recorded by output.

1 Final consumption expenditure by UK households in the UK & abroad

2 Final consumption expenditure in the UK by UK & foreign households

3 A potential improvement to our methodology for measuring the current price of cars within the transport COICOP has been identified during quality assurance. This will not impact HHFCE in chained volume measures, nor headline GDP and only affects figures in the quarterly tail. We will implement in the Quarterly National Accounts to be published in December 2018, the next time the 2017 onwards will be open for revision.

1 Final consumption expenditure by UK households in the UK & abroad

2 Final consumption expenditure in the UK by UK & foreign households

3 A potential improvement to our methodology for measuring the current price of cars within the transport COICOP has been identified during quality assurance. This will not impact HHFCE in chained volume measures, nor headline GDP and only affects figures in the quarterly tail. We will implement in the Quarterly National Accounts to be published in December 2018, the next time the 2017 onwards will be open for revision.

1 Final consumption expenditure by UK households in the UK & abroad

2 Final consumption expenditure in the UK by UK & foreign households

3 A potential improvement to our methodology for measuring the current price of cars within the transport COICOP has been identified during quality assurance. This will not impact HHFCE in chained volume measures, nor headline GDP and only affects figures in the quarterly tail. We will implement in the Quarterly National Accounts to be published in December 2018, the next time the 2017 onwards will be open for revision.

1 Final consumption expenditure by UK households in the UK & abroad

2 Final consumption expenditure in the UK by UK & foreign households

3 A potential improvement to our methodology for measuring the current price of cars within the transport COICOP has been identified during quality assurance. This will not impact HHFCE in chained volume measures, nor headline GDP and only affects figures in the quarterly tail. We will implement in the Quarterly National Accounts to be published in December 2018, the next time the 2017 onwards will be open for revision.
