## 1. Other pages in this release

- Average weekly earnings in Great Britain
- Earnings and employment from Pay As You Earn Real Time Information, UK
- Vacancies and jobs in the UK

## 2. Main points

In August to October 2023, the estimated number of vacancies in the UK fell by 58,000 on the quarter to 957,000. Vacancies fell on the quarter for the 16th consecutive period, with vacancies falling in 16 of the 18 industry sectors.

Annual growth in regular pay (excluding bonuses) in Great Britain was 7.7% in July to September 2023, slightly down on the previous periods, but is still among the highest annual growth rates since comparable records began in 2001. Annual growth in employees' average total pay (including bonuses) was 7.9%. This total annual growth rate is affected by the Civil Service one-off payments made in July and August 2023. In real terms (adjusted for inflation using Consumer Prices Index including owner occupier's housing costs (CPIH)), annual growth for total pay rose on the year by 1.4%, and regular pay rose on the year by 1.3%.

There were 229,000 working days lost because of labour disputes across the UK in September 2023. The majority of the strikes were in the health and social work and education sectors.

UK payrolled employee growth for September 2023 compared with August 2023 has been revised from a decrease of 11,000 reported in the last bulletin to an increase of 32,000.

The estimate of payrolled employees in the UK for October 2023 increased by 33,000 on the revised September 2023 figure, to 30.2 million. The October 2023 estimate should be treated as a provisional estimate and is likely to be revised when more data are received next month.

Because of the increased uncertainty around the Labour Force Survey (LFS) estimates, <u>we are publishing an alternative series of estimates of UK employment, unemployment, and economic inactivity</u>. These figures were derived using growth rates from Pay As You Earn Real-Time Information (excluding the early flash estimate) and the Claimant Count for the periods from May to July 2023 onwards. This is to provide a more holistic view of the state of the labour market while the LFS estimates are uncertain.

These alternative estimates for July to September 2023 show that;

- the UK employment rate decreased by 0.1 percentage points on the quarter to 75.7%
- the UK unemployment rate was largely unchanged on the quarter at 4.2%
- the UK economic inactivity rate was largely unchanged on the quarter at 20.9%.

# 3. Latest indicators at a glance

### 4. Labour market data

#### Summary of labour market statistics

Dataset A01 | Released 14 November 2023

Labour market statistics summary data table, including earnings, employment, unemployment, redundancies and vacancies, Great Britain and UK, published monthly.

#### Earnings and employment from Pay As You Earn Real Time Information, seasonally adjusted

Dataset | Released 14 November 2023

Earnings and employment statistics from Pay As You Earn (PAYE) Real Time Information (RTI) (experimental statistics), seasonally adjusted.

#### Adjusted employment, unemployment and economic inactivity

Dataset X10 | Released 14 November 2023

Experimental labour market estimates using administrative data to produce adjusted UK employment, unemployment and economic inactivity measures, seasonally adjusted. Includes a breakdown by countries and regions of the UK.

#### A guide to labour market data

Methodology | Updated 21 April 2023

Summary of labour market datasets, providing estimates of employment, unemployment, average weekly earnings, and the number of vacancies. Tables are listed alphabetically and by topic.

View all related data on our related data page.

Alternatively, Nomis provides free access to the most detailed and up-to-date UK labour market statistics.

# 5. Glossary

### Average weekly earnings

Average weekly earnings, detailed in our <u>Guide to labour market statistics methodology</u>, measure money paid by employers to employees in Great Britain before tax and other deductions from pay. The estimates are not just a measure of pay rises, because they also reflect, for example, changes in the overall structure of the workforce.

More high-paid jobs in the economy would have an upward effect on the earnings growth rate.

## **Economic inactivity**

People not in the labour force (also known as economically inactive in our <u>Guide to labour market statistics</u> <u>methodology</u>) are not in employment but do not meet the internationally accepted definition of unemployment. This is because they have not been seeking work within the last four weeks or they are unable to start work in the next two weeks. The economic inactivity rate is the proportion of people aged between 16 and 64 years who are not in the labour force.

## **Employment**

Employment measures the number of people in paid work or who had a job that they were temporarily away from (for example, because they were on holiday or off sick). This differs from the number of jobs because some people have more than one job. The employment rate is the proportion of people aged between 16 and 64 years who are in employment. See our <u>Guide to labour market statistics methodology</u> for a more detailed explanation.

### Unemployment

Unemployment measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. The unemployment rate is not the proportion of the total population who are unemployed. It is the proportion of the economically active population (people in work and those seeking and available to work) who are unemployed. See our <u>Guide to labour market statistics methodology</u> for more information.

#### **Vacancies**

Vacancies are defined as positions for which employers are actively seeking recruits from outside their business or organisation. The estimates are based on the Vacancy Survey. This is a survey of businesses designed to provide estimates of the stock of vacancies across the economy, excluding agriculture, forestry, and fishing (a small sector for which the collection of estimates would not be practical). For more information, see our <u>Guide to labour market statistics methodology</u>.

### Pay As You Earn (PAYE) Real Time Information (RTI)

These data come from HM Revenue and Customs' (HMRC's) Pay As You Earn (PAYE) Real Time Information (RTI) system. They cover the whole population, rather than a sample of people or companies, and they will allow for more detailed estimates of the population. The release is classed as experimental statistics (see our <u>Guide to experimental statistics methodology</u>), as the methodologies used to produce the statistics are still in their development phase. As a result, the series are subject to revisions.

A more detailed glossary is available in our **Guide to labour market statistics methodology**.

# 6. Measuring the data

We have been facing the challenge of falling response rates for household surveys, as have other comparable countries. This issue became more acute in the Labour Force Survey (LFS) data collected for August 2023. The LFS estimates due to be published in October 2023 were suspended because of quality concerns.

Therefore, we have developed a <u>comprehensive plan to address these concerns and reintroduce LFS estimates</u>. The plan covers both data collection and methodological improvements and will affect labour market-related releases in November and December 2023.

Further information on response rates and other quality-related issues for the LFS can be found in our quarterly Labour Force Survey performance and quality monitoring reports.

Our <u>Comparison of labour market data sources methodology</u> compares data sources and discusses some of the main differences.

#### Coronavirus

For more information on how labour market data sources were affected by the coronavirus (COVID-19) pandemic, see our <u>Coronavirus and the effects on UK labour market statistics article</u>.

## Making our published spreadsheets accessible

Following the Government Statistical Service (GSS) guidance on Releasing statistics in spreadsheets, we will be amending our published tables over the coming months to improve usability, accessibility and machine readability of our published statistics. To help users change to the new formats, we will be publishing sample versions of a selection of our tables and, where practical, initially publish the tables in both the new and current formats. If you have any questions or comments, please email us at <a href="mailto:labour.market@ons.gov.uk">labour.market@ons.gov.uk</a>.

### Labour market transformation

We have published a <u>Labour market transformation article</u> providing an update on the transformation of labour market statistics.

We welcome your feedback on this latest update and our plans. Please email us at <u>labour.market.transformation@ons.gov.uk</u> to tell us what you think.

# 7. Strengths and limitations

The estimates presented in this bulletin contain uncertainty. For more information, see our <u>Uncertainty and how we measure it methodology</u>.

Information on revisions is available in our Labour market statistics revisions policy.

Information on the strengths and limitations of this bulletin is available in our previous bulletin, <u>Labour market overview</u>, <u>UK: April 2021</u>.

Further information is available in our <u>Guide to labour market statistics methodology</u>.

#### Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

#### Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity rate for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

<sup>1.</sup> The Labour Force Survey (LFS) is a survey of households in the UK.

<sup>2.</sup> The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.

<sup>3.</sup> The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.

<sup>4.</sup> The headline inactivity rate is the number of people aged 16 to 64 divided by the population aged 16-64.

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

<sup>1.</sup> The split between full-time and part-time employment is based on respondents' self-classification.

<sup>2.</sup> This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.

3. These series cover Employees and Self-employed only. These series include some temporary employees.

4. The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of the other columns in this section of the table.

Explanatory Note: The public and private sector employment series have been affected by a number of major reclassifications where bodies employing large numbers of people have moved between the public and private sectors. These major reclassifications are as follows:

Further Education corporations and Sixth Form College corporations in England are included in the private sector from June 2012 but in the public sector for earlier time periods

Royal Mail plc is included in the private sector from December 2013 but in the public sector for earlier time periods.

Lloyds Banking Group plc is included in the public sector from December 2008 to December 2013 but in the private sector for earlier and later time periods.

Royal Bank of Scotland pic is included in the public sector from December 2008 but in the private sector for earlier time periods.

Network Rail is included in the private sector before December 2002. From December 2002 onwards it is included in the public sector (except for the period from June 2003 to

March 2004, when it is included in the private sector).

Northern Rock is included in the public sector from December 2007 until December 2011 but in the private sector for earlier and later time periods.

Bradford and Bingley is included in the public sector from September 2008 but in the private sector for earlier time periods.

Welsh Further Education colleges are included in the private sector from March 2015 but in the public sector for earlier time periods.

Housing associations in England are included in the public sector between September 2008 and September 2017; they are in the private sector for earlier and later time periods

Housing associations in Scotland are included in the public sector from September 2001 until June 2018; they are included in the private sector for earlier and later time periods.

Housing associations in Wales are included in the private sector from June 2018; they are included in the public sector for earlier time periods

Housing associations in Northern Ireland are included in the public sector from March 1999 to June 2020.

Train operating companies in England, Scotland and Wales operating under emergency measure agreements are included in the public sector from June 2020.

The series shown at Table 4 (in columns 6 to 9) for public and private sector employment excluding the effects of major reclassifications show all of the above mentioned bodies included in the private sector for all time periods and excluded from the public sector for all time periods. When using figures from this table, the latest estimate of the number of people employed in the public and private sectors should be taken from columns 1 and 3 respectively. However the quarterly and annual changes in employment shown in these columns are affected by reclassifications. Figures from columns 6 and 8 should be used for issessments of the recent underlying changes in public and private sector employment. The changes in employment shown in these columns are measured on a consistent basis to remove the effect of major reclassifications.

- Estimated as the difference between LFS total employment and the data from public sector organisations.
   LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.
   This series excludes locally engaged staff stationed outside the United Kingdom.
- This series excludes the Northern Ireland Civil Service. 5. This series may not exactly equal the sum of the components because each component is independently seasonally adjusted.

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at: https://www.ons.gov.uk/employmentandlabourmarket/peopleinwork/publicsectorpersonnel/bulletins/publicsectoremployment/lates

Workforce jobs enquiries 01633 456776 Sources: Employer surveys, Labour Force Survey and administrative sources

<sup>1.</sup> Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

<sup>2.</sup> This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

The total series includes people who do not state their country of birth or nationality. The total levels series therefore do not equal the sum of the "UK" and "Non-UK" series.

 This series consists of all 27 EU member states.

 This series consists of all 27 EU member states.

 This series consists of hote people where main reason for being economically inactive was because they were students. It does not include all students as some students will be included in the employment and unemployment estimates.

Source: Labour Force Survey
Labour market statistics enquiries: labour.market@ons.gov.uk

Note: When comparing quarterly changes ONS recommends comparing with the previous non-overlapping 3-month average time period (eg, compare Apr-Jun with Jan-Mar, not with Mar-May).

<sup>&</sup>lt;sup>1</sup> Denominator = economically active for that age group.

<sup>\*</sup> Sample size too small for reliable estimate.

Data Source: Labour Force Survey.

Labour market statistics enquiries: labour.market@ons.gov.uk

Discouraged workers are those who are not looking for work because they believe no jobs are available.
 Other reasons include people who (i) are waiting the results of a job application, (ii) have not yet started looking for work, (iii) do not need or want employment, (iv) have given an uncategorised reason for being economically inactive, or (v) have not given a reason for being economically inactive.

Earnings enquiries: 01633 456120 Email: earnings@ons.gov.uk

<sup>1.</sup> Estimates of total pay include bonuses but exclude arrears of pay.

<sup>2.</sup> The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

<sup>3.</sup> Estimates of real earnings are calculated by deflating the nominal earnings estimates by the Consumer Prices Index including owner occupiers' housing costs (CPIH), our preferred measure of consumer price inflation.

Data source: ONS Labour Disputes Survey Labour disputes enquiries 01633 455400

As figures are taken from OECD they will not match ONS published figures for the United Kingdom.
 Employment rate data is for ages 15 to 64. For the United Kingdom and the United States, the lower age limit is 16 years old.
 Unemployment rate data is for ages 15 and over. For the United Kingdom and the United States, the lower age limit is 16 years old.

In April 2020, collection and publication of labour disputes data were temporarily suspended to protect and prioritise our outputs in response to the coronavirus (COVID-19) pandemic. In June 2022, collection of the Labour Disputes Inquiry restarted, but only for the period from January 2022 onwards.

Although collection of labour disputes statistics restarted for the period from January 2022 onwards, collection for June 2022 onwards was prioritised. Data for the period January 2022 to May 2022 will be made available shortly.

<sup>3.</sup> Data for number of workers involved are only available from January 1986 onwards.

Labour market statistics enquiries: labour.market@ons.gov.uk

<sup>1.</sup> The redundancy level is the number of people who were made redundant in the three months prior to interview. The figure is not seasonally adjusted.

<sup>2.</sup> The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.

K03000001	Great Britain	35,752	-148
E92000001	England	31,496	-142
E12000001	North East	1,287	12
E12000002	North West	3,840	-49
E12000003	Yorkshire and The Humber	2,827	-4
E12000004	East Midlands	2,500	-29
E12000005	West Midlands	3,070	-28
E12000006	East	3,318	-27
E12000007	London	6,484	-72
E12000008	South East	5,040	71
E12000009	South West	3,130	-17
W92000004	Wales	1,467	-41
S92000003	Scotland	2,789	35
N92000002	Northern Ireland	912	-5

Workforce jobs are mainly sourced from employer surveys and are tabulated by region of workplace.

HM Forces stationed abroad are included in the UK workforce jobs estimates but not in the regional estimates. The UK workforce jobs estimates therefore do not equal the sum of the regional estimates.
